Building the future  
of livestock protection™

## Your Trusted Biosecurity Experts

58%  
Score

Lane Farm

How can I improve  
biosecurity on my farm?

What measures should I take  
to prevent disease outbreaks  
in my livestock?

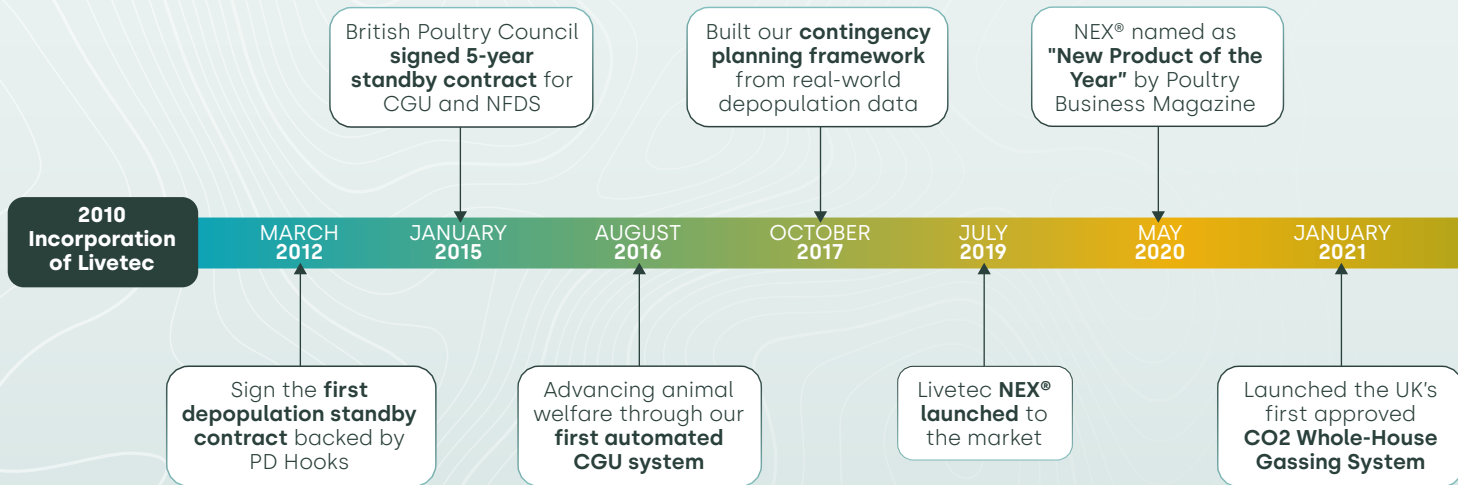

“ Our purpose is to work with you to ensure your livestock business is prepared, protected and supported. ”

Julian Sparrey, Group Technical Director

# Who is Livetec

**Livetec is a leader in livestock protection, helping poultry and pig businesses stay one step ahead of disease risk.**

Combining biosecurity expertise, emergency response, training and digital innovation, we help producers protect their livestock, strengthen resilience and keep their operations moving - whatever challenges come their way.

“Our partnership with Livetec reflects our commitment to taking a proactive approach to risk, rather than simply responding to it.”

Richard Griffiths, CEO, British Poultry Council

Responded to over  
**350**  
on-farm emergency situations

**2,000+**  
organisations

James Baxter, Chairman and Farmer, BFREPA

CELEBRATING  
**15**  
YEARS  
OF BIOSECURITY EXCELLENCE

## Digital tools for modern livestock risk management.

Our digital solutions drive businesses' improved biosecurity, so they stay prepared and ahead of risk when a crisis strikes.

“ The beauty of the Livestock Protect Platform is the power of the features. The simplicity and convenience combined give confidence that should the worst happen, all the information required is easily available and accessible to those who are going to be able to help the most. ”

Sam Jones, General Manager of Production,  
Aviagen Turkeys

### Track and Trace:

Digital farm entry and visitor management

### Emergency Response Planning:

Comprehensive action plan for when disease strikes

### Predictive tools:

Migration data and disease intelligence for more accurate prediction

### AI outbreak mapping:

Spot historical and current outbreak patterns

### Digital Biosecurity Assessment Tool (eBAS):

Biosecurity vulnerability management online and on your phone

### Wild bird tracking:

Better predict where outbreaks will next emerge

Zac Griggs  
Sales Development Representative

### Scan to book a demo
