

The Future of Farm Site Access and Biosecurity Management

# Unlock efficiency, compliance, and enhanced security with AccessProtect

AccessProtect is a digital-first solution designed to replace outdated manual sign-in books with a smart, trackable, and customisable QR code system.

It seamlessly integrates into your farm's biosecurity strategy, making it easier to track site access, ensure regulatory compliance, and improve operational efficiency.

*It's time to ditch the paper log in book...*

## Why AccessProtect?

In today's rapidly evolving agricultural industry, compliance and biosecurity are top priorities.

Whether you're managing biosecurity risks, adhering to industry regulations, or preparing for audits, AccessProtect offers a robust digital platform that empowers you to:

- Simplify Compliance
- Enhance Biosecurity
- Boost Operational Efficiency
- Streamline Audits and Inspections

No more paper log in books needed, with 'mickey mouse' signing in daily and no log out control. AccessProtect offers you a straightforward solution which can be set up and adopted on all your essential site entry points in a matter of minutes.

## Key Features of AccessProtect

### Track & Trace Compliance

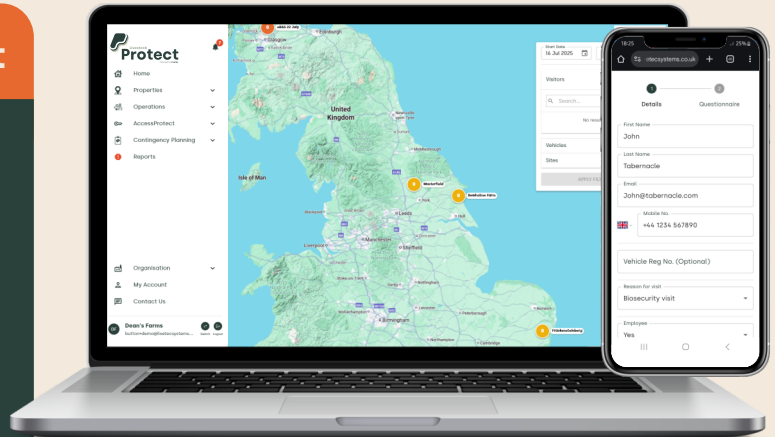

- ✓ **Real-Time Visibility:** Instantly track who's on-site with accurate, up-to-date data.
- ✓ **Instant Access to Historical Data:** Quickly retrieve past records for audits and inspections.

### Effortless Compliance & Audit Readiness

- ✓ Automatically capture and store all site access logs.
- ✓ Access records securely from any device, via the Livestock Protect Platform, at any time.
- ✓ Scan QR-codes with any mobile device, logging site access even without an internet signal, cached data will sync when you're back in range.

### Enhanced Biosecurity & Risk Management

- ✓ Monitor site access across multiple locations to detect potential biosecurity risks.
- ✓ Track personnel and equipment movements to reduce contamination risks.

### Real-Time Operational Oversight

- ✓ Manage all access data in one centralised platform.
- ✓ View logs from any device, whether on-site or remote.

### Paper-Free Efficiency

- ✓ Fully digitise access logs to reduce errors and save time.
- ✓ Tailor the system to help you meet specific industry standards like Red Tractor or RSPCA.

## How AccessProtect Solves Your Key Challenges

### Streamlined Compliance

AccessProtect ensures that all site access is automatically logged and helps you demonstrate adherence to the specific requirements of industry standards like Red Tractor and RSPCA. By eliminating manual data entry, you reduce the chance of errors and missed compliance details. Even in areas with poor or limited internet access, you can still record information to be uploaded when in signal, ensuring complete records.

### Simplified Biosecurity Management

Farming operations are vulnerable to disease outbreaks due to uncontrolled access. AccessProtect allows you to monitor and trace personnel, equipment, and animal movements across your farm, significantly improving biosecurity management.

### Operational Efficiency

With no need for paper records or physical logbooks, AccessProtect saves time and reduces administrative workload. You get instant access to detailed reports without searching through manual entries, streamlining day-to-day operations.

### Peace of Mind During Audits

Never worry about scrambling to find records during audits. With AccessProtect, all access data is securely stored, digitally traceable, and ready for review. This reduces stress during inspections and helps ensure compliance is maintained year-round.

AccessProtect is easy to implement and can be customised to fit your farm's needs.

With user-friendly software and a secure digital platform, you can start benefiting from real-time tracking and traceability today.
