

Take Control of Your Biosecurity with The Livestock Protect eBAS

Livetec's Livestock Protect Platform gives farmers, keepers, and producers the tools to manage biosecurity smarter, faster, and with confidence. Our electronic Biosecurity Assessment Service (eBAS) empowers you to assess, improve and monitor biosecurity across your sites - with all the expert knowledge of Livetec, now digitised and at your fingertips.

eBAS isn't just about staying ahead of disease threats like Avian Influenza it's about future-proofing your business, strengthening your resilience against all disease challenges, and putting prevention at the heart of your operations. Practical, data-driven insights, accessible anytime, anywhere, help you stay protected today and prepared for tomorrow.

What is eBAS?

eBAS is your self-guided digital tool to assess farm biosecurity across six key operational zones:

- Rest of Farm Areas - The farm and environment outside of the poultry unit perimeter.
- Perimeter Control Points - access points to the poultry unit.
- General Biosecure Area - all the area inside the poultry unit perimeter but excluding the poultry buildings.
- Intermediate Areas - access areas to the poultry buildings but not directly to the live birds, e.g. anterooms and egg rooms.
- Live Bird areas - where the birds live.
- Range Areas - when applicable to production system.

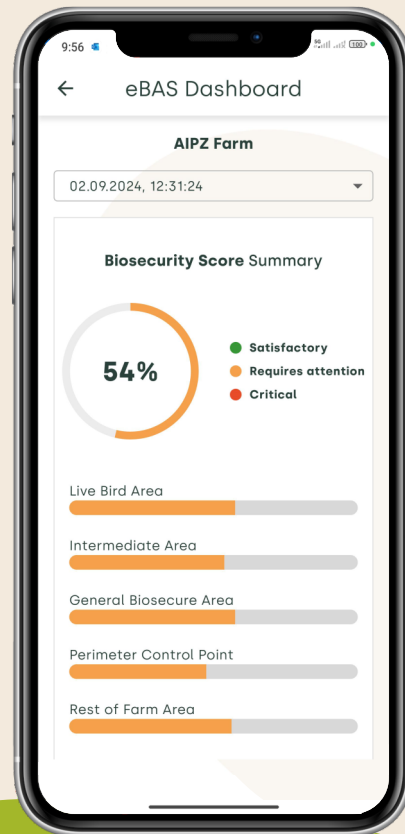

Using a guided process developed by Livetec's biosecurity experts, eBAS generates a **biosecurity score** with tailored recommendations, providing practical suggestions for fixing any issues big or small.

Key Benefits:

- ✓ **Easy to Get Started** – Complete at your pace, online, across both mobile and web versions
- ✓ **Real-Time Insights** – Visual dashboards across all your sites
- ✓ **Risk Prioritisation** – Support investment decisions with clear, ranked recommendations
- ✓ **Trusted knowledge** – Built with Livetec's proven field experience
- ✓ **Visibility & Control** – Manage all your assessments and updates in one place
- ✓ **Multi-Site Ready** – Perfect for farms, producers, or groups managing multiple holdings
